Great game overall I really like the feeling of progression you get as you build up your ship and unlock new abilities, and some of the later bosses were really hard to overcome.

The passive multiplayer is a fun way to play against other people, but other players rarely chat.. The art style is minimalistic but fits well with the gameplay, as does the music.. Each part can be individually placed and angled on your design, allowing for complex and interesting setups, from broadside laser equipped corvettes to teleporting stealthed harpooners and armoured drone spawning dreadnoughts!FeaturesBuy and upgrade parts to improve your ships as you progress through the game.
